Dear Editor,

I wish to submit an original research article entitled “**Education of smart fish feeder technology by using Internet of things (IoT) based for catfish farming groups in Dham Pulo village, Aceh Besar**” for consideration by Jurnal Pengabdian kepada Masyarakat (Indonesian Journal of Community Engagement).

I confirm that this work is original and has not been published elsewhere, nor is it currently under consideration for publication elsewhere and does not contain elements of plagiarism.

In this paper, I show that the smart fish feeder by using Internet of thing (IoT) is very significant. This is because this technology is high-end, effective and efficient.

We believe that this manuscript is appropriate for publication by Jurnal Pengabdian kepada Masyarakat (Indonesian Journal of Community Engagement) because it is disseminated the conceptual thoughts or ideas and research results that have been achieved in the area of community services.

We have no conflicts of interest to disclose.

Please address all correspondence concerning this manuscript to me at dfputra@gmail.com.

Thank you for your consideration of this manuscript.

Sincerely,

Dedi Fazriansyah Putra
